

## **Lead Robot Inspector Requirements**

1. A prospective Lead Robot Inspector should have three to five years robot building experience on an FRC team (preferably in a position that would have required reading and conforming to the printed robot rule book).
2. A prospective Lead Robot Inspector should have acted as a Robot Inspector at two prior events (or one Championship event) within the previous three years.
3. A prospective Lead Robot Inspector should have participated in at least two inspector phone conferences in that same time period.
4. A prospective Lead Robot Inspector should possess the following skills:
  - a) Ability to resolve conflicts.
  - b) Ability to manage personal time and that of others.
  - c) Ability to train new inspectors and maintain consistent inspecting for each inspector.
  - d) Ability to act with Gracious Professionalism at all times.
5. A prospective Lead Robot Inspector must pass the VIMS review process including background check.
